

Institute for a Safer Florida

Statewide Polling Results

February 27, 2019

METHODOLOGY

Using a national calling center, the Institute for a Safer Florida conducted interviews with a sample of 755 registered voters across the state of Florida. The survey was conducted from Tuesday, January 8th through Monday, January 14th during evening hours.

The composition of respondents took into account current statewide voter registration and the sample was balanced by gender, age, party, race, and region in order for our distribution to be consistent and similar to the actual registered population. To better reach our targets and maintain a representative population, 57% of calls were made to cellphones.
